# Chapter 1. Introduction

こんにちは、日本語のサンプルです。 A paragraph followed by a simple list.

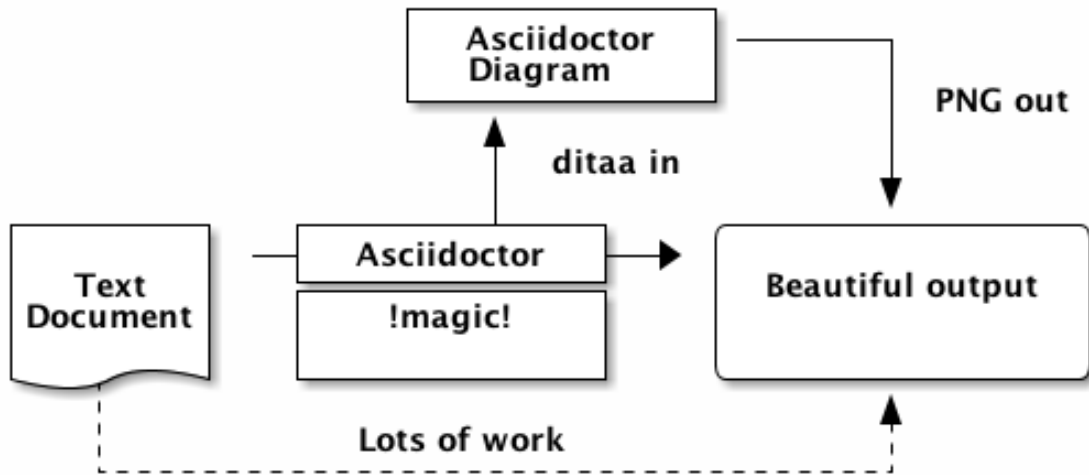

Figure 1.1.

Figure 1.2.

Figure 1.3. The PlantUML block extension class

Ruby source sample

```
puts ['AsciiDoc', 'GitHub', 'AsciiDoc on GitHub'].map {|item|
  "I use #{item}!"
} * "\n"
```

- item 1
- item 2

Here's how you say "Hello, World!" in Ruby.

A basic Ruby application

```
puts "Hello, World!"
```

asciidoc-fopub takes the pain out of converting a DocBook file to a PDF file like this one. All you need is a Java Development Kit (JDK) and this project. The rest of the software is fetched and configured by Gradle.
